Technical Data

Engine

Maximum power	**430 kW / 584 hp**

Overboost power with Launch Control up to	**470 kW / 639 hp**
30-Minutes-Power	**145 kW / 197 hp**
Max. torque with Launch Control up to	**1,130 Nm**

Performance

Top speed	**162 mph**
Acceleration 0-60 mph with Launch Control	**3.1 sec**
Acceleration 1/4 mile with Launch Control	**11.4 sec**

Body - Dimensions and Weights

Length	**4,784 mm**

Overall Width	**1,938 mm**
Width (with mirrors folded)	**1,954 mm**
Width (with mirrors)	**2,152 mm**
Height with air suspension (standard level)	**1,623 mm**
Height with air suspension (extra-low level)	**1,593 mm**
Height with air suspension (low level)	**1,608 mm**
Height with air suspension (off-road level)	**1,643 mm**
Height with air suspension (extra off-road level)	**1,663 mm**
Wheelbase	**2,893 mm**
Turning circle diameter	**11.1 m**

Tire track turning circle	**10.4 m**
Unladen weight (curb weight)	**2,447 kg**
Unladen weight (DIN)	**2,405 kg**
Unladen weight (EC)	**2,480 kg**
Permissible gross weight	**2,950 kg**
Maximum load	**545 kg**
Maximum permissible roof load with Porsche roof transport system	**75 kg**
Maximum towing capacity (braked)	**2,500 kg**
Maximum towing capacity (unbraked)	**750 kg**
Trailer coupling maximum vertical load	**100 kg**

Luggage compartment volume (front)	**84 l**
Rear luggage compartment volume (with seats folded)	**1,288 l**
Open luggage compartment volume (V211-2)	**480 l**
Overhang front	**945 mm**
Overhang rear	**946 mm**
Max. ground clearance with air suspension (normal ride height)	**185 mm**
Max. ground clearance with air suspension (low level)	**170 mm**
Max. ground clearance with air suspension (off-road level)	**205 mm**

Max. ground clearance with air suspension (extra off-road level)	225 mm
Approach angle with air suspension (standard level)	12.7 °
Departure angle with air suspension (standard level)	20.7 °
Approach angle with air suspension (extra off-road level)	15.4 °
Departure angle with air suspension (extra off-road level)	23.9 °
Breakover angle with air suspension (standard level)	14.9 °
Breakover angle with air suspension (low level)	13.7 °

Breakover angle with air suspension (off-road level)	**16.5 °**
Breakover angle with air suspension (extra off-road level)	**18.1 °**
Max. wading depth with steel suspension (DIN)	**300 mm**
Max. wading depth with steel suspension (PASM DIN)	**300 mm**
Max. wading depth with steel suspension (EC)	**300 mm**
Max. wading depth (steel suspension)	**300 mm**
Max. wading depth with air suspension (standard level)	**300 mm**
Max. wading depth with air suspension (off-road	**320 mm**

level)

Max. wading depth with air suspension (extra off-road level)	**340 mm**

Range

Range combined (WLTP)	**341 mi**
Range city (WLTP)	**432 mi**
Recharged range in 10 min with 150 kW (WLTP)	**74 mi**
Recharged range in 10 min with maximum charging power (WLTP)	**149 mi**

Battery Capacity and Charging

Battery energy content (gross)	**100.0 kWh**
Max. charging power (DC)	**270.0 kW**
Charging time alternating current (AC) at 11kW (0 to up to 100%)	**10.0 h**
Charging time for alternating current (AC) with 22 kW (0 to up to 100%)	**5.3 h**
Charging time for direct current (DC) with 120 kW (500V, 250A, 10 to up to 80 %)	**46.00 min**
Charging time for direct current (DC) with 150kW (10 to up to 80%)	**33.00 min**
Charging time for direct current (DC) with maximum charging power (10 to up to 80%)	**21.00 min**

Consumption and Emissions

CO_2 emissions combined (WLTP)	**0 g/km**
Electrical consumption combined (WLTP)	**19.9 kWh/100 km**
Electrical consumption city (WLTP)	**15.6 kWh/100 km**
Electrical consumption urban (WLTP)	**15.1 kWh/100 km**
Electrical consumption suburban (WLTP)	**15.9 kWh/100 km**
Electrical consumption extra urban (WLTP)	**18.3 kWh/100 km**
Electrical consumption highway (WLTP)	**25.4 kWh/100 km**

Sound level (type approved based on UN-R 51)

Sound level of passing vehicle	**68 dB**

Porsche Financial Services

Porsche Solutions Personal Contract Plan (PCP)

Why should our finance products be any less dynamic than our sports cars?
Solutions PCP is our flexible finance plan that will allow you to fulfil your sports car dream - without limiting your financial flexibility for other dreams.

Term
18 - 49 months

Vehicles
for all new and pre-owned cars

Customers
private and business

Mileage
5,000 to 30,000 miles p.a.

Agreement type
Hire Purchase agreement with an optional final payment

Agreement end
you will have three options. i: part exchange for a new Porsche, ii: keep it by paying the optional final payment and option to purchase fee, iii: simply return the vehicle to Porsche. Terms and Conditions apply.

Tell me more about Porsche Solutions PCP.

*Data determined in accordance with the measurement method required by law. Since 01 September 2017 certain new cars have been type approved in accordance with the Worldwide Harmonized Light Vehicles Test Procedure (WLTP), a more realistic test procedure to measure fuel consumption and CO_2 emissions. From 01 September 2018 the WLTP will replace the New European Driving Cycle (NEDC). Due to the more realistic test conditions, the fuel consumption and CO_2 emission values determined in accordance with the WLTP will, in many cases, be higher than those determined in accordance with the NEDC. This may lead to corresponding changes in vehicle taxation from 01 September 2018. You can find more information on the

difference between WLTP and NEDC at www.porsche.com/wltp.

Currently, we are still obliged to provide the NEDC values, irrespective of the testing method used. The additional reporting of the WLTP values is voluntary until their obligatory use. As far as new cars, (which are type approved in accordance with the WLTP) are concerned, the NEDC values will therefore be derived from the WLTP values during the transition period. To the extent that NEDC values are given as ranges, these do not relate to a single, individual car and do not constitute part of the offer. They are intended solely as a means of comparing different types of vehicle. Extra features and accessories (attachments, tyre formats etc.) can change relevant vehicle parameters such as weight, rolling resistance and aerodynamics. Additionally, weather and traffic conditions, as well as individual handling, can affect the fuel consumption, electricity consumption, CO_2 emissions and performance values of a car.
